**Base Salary**

₦ 80,000 - ₦ 100,000

**Experience**

1 year and above

**Skills**

Communication

Caregivers need to be able to communicate clearly with patients, family, friends, and other professionals. This includes being able to share information about the patient's progress, health concerns, and observations.

Observation

Caregivers need to be able to notice changes in a patient's behavior or well-being, and use this information to identify and remove hazards or recommend steps to improve the patient's condition.

Compassion

Caregivers need to be able to understand and share in the emotions of the people they care for.

Physical strength

Caregivers may need to perform physical tasks such as helping with mobility, carrying groceries, or vacuuming.

Problem solving

Caregivers need to be able to solve problems that may arise in the course of their work.

Patience

Caregiving can be challenging, especially for patients with dementia, so caregivers need to be patient.

Willingness to learn

Caregivers may need to learn new skills, such as how to perform skilled nursing procedures at home.

raised toilet seats, grab bars, non-skid mats, nightlights, smoke and carbon monoxide alarms, and fire extinguishers

Advocacy: Advocating for the care recipient's needs
